

PG&E now requires all line-side taps to go through variance testing before the engineering review of the interconnection process. This requires us to submit the following photos:

- Pictures, If you are performing a line side tap the following pictures are required. Please attach pictures clearly showing;
  - [ ] Customer's side open section
  - [ ] Picture showing routing identified by arrows/circles
  - [ ] Picture showing connection points identified by arrows/circles
  - [ ] Picture showing the entire meter panel
